23 MARCH 2023

**HONITON COMMUNITY SPACE (CUB) - MAIN ROOM,
SCHOOL LANE, HONITON, EX14 1QL**

1PM - 3.30PM

Rapidly Responding Catchments, or RRCs, are small river catchments (under 10km²) where high rainfall events can lead to flood water overwhelming downstream communities.

We have identified
The Gissage stream in Honiton as an RRC.

We would like to work with you to build your community's climate resilience to flooding by co-creating innovative approaches such as Nature Based Solutions (NBS).

This work comes under the Devon Resilience Innovation Project (DRIP) and is associated with the Dartmoor Headwaters Natural Flood Management Project
